

Weekly Assignment 4

Lesson 7 & 8

Due Date: Before Next Class(Saturday)

This assignment covers the core fundamentals of CSS3 and styling basics. You will apply key styling concepts including inclusion methods, box model manipulations, typography, and color formatting to enhance your project work.

Task 1: Style Phase 1 Tribute Page with External CSS

Apply modern external stylesheet rules to refactor and visually enhance your Phase 1 Tribute Page project:

- **External CSS Integration:** Link an external stylesheet (.css) using appropriate tags in the document head and eliminate inline styling.
- **Typography & Colors:** Define legible typography rules (font-family, font-size, line-height, text-align) and cohesive color schemes using HEX, RGB, or HSL values.
- **Box Model Rules:** Manage content layout, margins, padding, and borders while ensuring proper box-sizing configurations.

Task 2: Profile Card Component with Custom Padding & Borders

Design a modular profile card UI component demonstrating CSS Box Model mastery:

- **Component Specifications:**
 - ◆ **Box Model Components:** Incorporate precise content dimensions, custom padding, stylized borders, and controlled margins.
 - ◆ **Margin Collapsing & Sizing:** Demonstrate handling of box-sizing (border-box) and prevent unwanted margin collapsing.
 - ◆ **Visual Presentation:** Utilize varied color formats (HEX, RGB, HSL) for background, text, and border accents..

Submission Instructions: Please submit your completed assignment files before the deadline. Good luck with your coding!

Have fun coding with Colors! (✿◡◡)
